

Janome Memory Craft 15000

JANOME: The world's easiest and most reliable sewing machines:

Janome Memory Craft 15000, sewing and embroidery machine, combines all the most innovative technologies. The MC15000 is constructed in the Janome factory in Tokyo (Japan), which provides unparalleled quality.

Believe in Your Creativity
JANOME®

Janome MC 15000: the embodiment of all the most advanced ideas in the world of sewing and embroidery. Operate the machine with the help of a PC, laptop and even iPad, using a wireless connection. Two apps have been especially developed for the iPad: AcuMonitor and AcuEdit, allowing you to remotely monitor the operation of the machine and do the editing of embroidery from the tablet!

It is worth noting the Janome 15000 embroidery unit is designed with Janome's most advanced robotics. The 15000 embroidery unit is equipped with high precision and reliable system of linear guide, which ensure excellent quality embroidery. The module is very compact and can also be used in the normal sewing mode.

You will be amazed with the 15000's extensively rich collection (more than 1000!) built-in sewing operations.

With 480 built-in embroidery designs, many of which are exclusively available only in the 15000 model. You'll be surprised at the number of useful features which the 15000 is equipped with. Sophisticated ergonomics and intuitiveness make way for simple operation on the 9-inch touch screen. It is easy to understand even to the beginner. Fine detail work is easier to see as a result of the additional Highlight LED lighting, and removable Acu-Magnifier.

Janome 15000 - A sewing machine of unparalleled craftsmanship, designed with the intelligence of the computer so as to open doors and opportunities. Welcome to the highest level of creativity, The Janome Memory Craft MC15000.

Janome 15000 Overview:
